## PATIENT CARE BENEFITS

- More exact targeting of cancer tumors.
- Highest attainable cancer control rates.
- Few to no side effects compared to other oncology modalities.
- Much healthier and higher quality of life during and after treatment.
- Non-invasive treatment reducing possibility of infection in already immune-impaired patients.
- Painless outpatient treatments with minimal disruption to daily life (education, work or play).
- Particularly beneficial for children who are more severely impacted by conventional radiation and chemotherapy.
- Helps to eradicate cancer before it spreads, reducing the need for additional therapies.
- Overall healthcare cost reductions due to reduction in treatment-related secondary tumors, cognitive impairments, etc.
- Patient convenience with related medical facilities developed in the regional health technology setting.

## RESEARCH & DEVELOPMENT BENEFITS

- Clinical trials and research at a revolutionary Proton Therapy center will advance the body of knowledge to combat cancer.
- Start-up incubator facilities are expected to drive additional R&D.
- Cooperative connections to regional science parks are anticipated.

## ACADEMIC BENEFITS

- Symbiotic relationships with regional academic centers, including WCSU, are expected.
- A hotel conference and training center is anticipated.
- DP will support other regional academic initiatives.
